Coil Zipper

with Insertion-Assisted Slider

This slider has a pin guide that allows a separable pin to be inserted into the opening of the slider. The opening has been widened to allow for easier pin insertion from a wider angle compared to standard sliders.

The underside of the support slider opening is larger than normal sliders.

Insert support slider

Normal slider

Line of sight

A wider insertion opening of the slider makes the opening easier to see

Item Availability

Size / Chain type	Front / Reverse	Open	Two-way
3C	Front	○	○
	Reverse
