

NATULON+Plus®

CREATE MORE WITH LESS

NATULON+Plus®

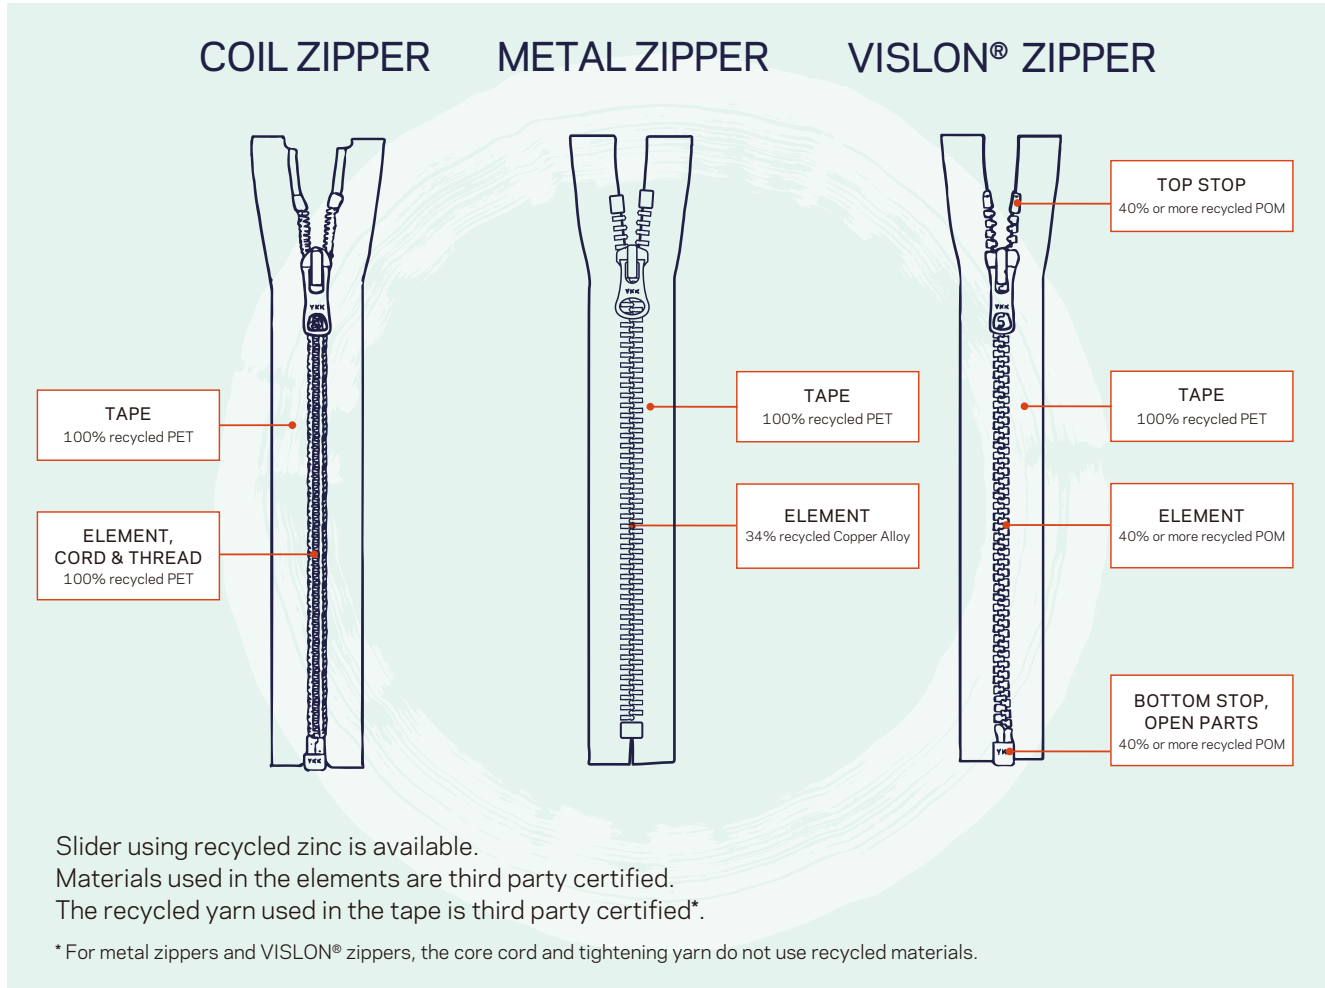

Using recycled materials for both the elements and the tape, the NATULON Plus® zipper contains the highest quantity of recycled materials of our NATULON® products. This higher recycled content further reduces its environmental impact with substantially lower Greenhouse Gas emissions, compared to items made of virgin materials.

YKK™

Little Parts. Big Difference. >>>

NATULON+Plus®

While the NATULON® zipper only uses recycled material for the zipper tape, the NATULON Plus® zipper uses for the tape and the elements. With this increased use of recycled material comes higher reduction of GHG emissions over NATULON® zippers.

recycled material ratio example * Based on in-house calculations by weight.

Zipper Type	Size	Recycled material ratio (Chain)
COIL ZIPPER	No.3	100%
	No.5	100%
METAL ZIPPER	No.3	Approx. 47%
	No.5	Approx. 43%
VISLON® ZIPPER	No.3	Approx. 61%
	No.5	Approx. 59%

* Recycled material ratio is weight basis.
