

Shiny Aluminum Zipper NEW ITEM

New color (Shiny Aluminum) in Aluminum Alloy Zipper.

Lightweight feature: Compared to brass, No.5 O/E 60cm 40% lighter, No.5 C/E 20cm 35% lighter.

Better oxidation performance compared to YKK standard brass zipper, better hand feel, and smoother operation compared to YKK original 5RA, which brings your comfortable wearing experience.

Not suitable for garment which needs special washing.

NO.5 20cm close-end

⚠ Caution

Please kindly note the following special explanation and precautions due to its material nature:

1. Strength is generally lower than standard brass teeth zipper.
2. Gradual oxidation and color changing of teeth may happen after repeated washing or time.
3. Please contact your YKK sales representative for further details on the 'Precautions for Aluminum Zippers'.

Please fully understand the precautions above before placing bulk orders and consider checking by actual samples before using this product.
