# VISLON® UV

## EXPOSURE DAMAGE

Test method: ASTM G155 Cycle8

VISLON® UV with Weather-resistant Elements and Tape is a unique series of VISLON® zippers which designed to resist damage from weather phenomena.

The chain crosswise strength and the appearance of this product remains almost the same level after a 1,500-hour weather-resistance test, whereas the strength of VISLON® standard zipper decreases about 20% and the tape color will fade after the same test.

## CHAIN CROSSWISE STRENGTH TEST RESULT AFTER 1,500 HOURS

## AVAILABILITY

Size	Chain type	Classification			
		Close	Open	Two-way	Chain
10	VF	OK	OK	-	OK

## COLOR VARIATION

Tape	Elements	Top and bottom stop	Open parts
Black	Black	Black	Black

## RECOMMENDED APPLICATIONS

Boat Tops

Tents
