## ATTENTION

Recommended line is more than 2.0 points(0.706mm) in order to be printed clearly.

Actual printed lines will look different from artwork depending on the color combination of the line and the background.

It is recommended to make the lines thicker especially when the background color is a dark color.

Due to the characteristics of ink-jet printing, blurring and misalignment may occur especially with AquaGuard®.

Please contact a YKK sales representative about the detailed item information and care instructions of each PRIFA® items variant.
