3D SLIDERS

scan to
discover more

YKK began receiving buyers' requests for 3D slider data in 2019. Since then, YKK has been able to provide 3D files in OBJ, STL, and FBX formats for Sliders, Snap & Button and Plastic Hardware. This enables designers to easily incorporate different 3D YKK product models into their designs, freely moving and visualizing them in photo-realistic 3D as they create.

YKK announced our Digitalization Booth, located in our Digital Showroom, in 2023. There you can try out our new "YKK Trim Creator", a valuable tool that enables you to visualize and customize trims and promptly generate the corresponding item codes. With this tool, you can create real-time 3D visualizations of fastener components and effortlessly share the zipper information via URL.

These digital capabilities enhance the efficiency of the garment design and adoption process and minimize the need for physical samples, decreasing costs and carbon footprint by cutting back on waste and shipping while improving the sales process for buyers.
