YKK began receiving buyers' requests for 3D slider data in 2019. Since then, YKK has been able to provide 3D files in OBJ, STL, and FBX formats for Sliders, Snap & Button and Plastic Hardware. This enables designers to easily incorporate different 3D YKK® product models into their designs, freely moving and visualizing them in photo-realistic 3D as they create.

GCV1604
METALLION® with Texturized Puller
Code: CNMOR-56 DA8TW536 O PB16 EL-GOL1 GREEN-F N-ANTI ND-B P-TOP

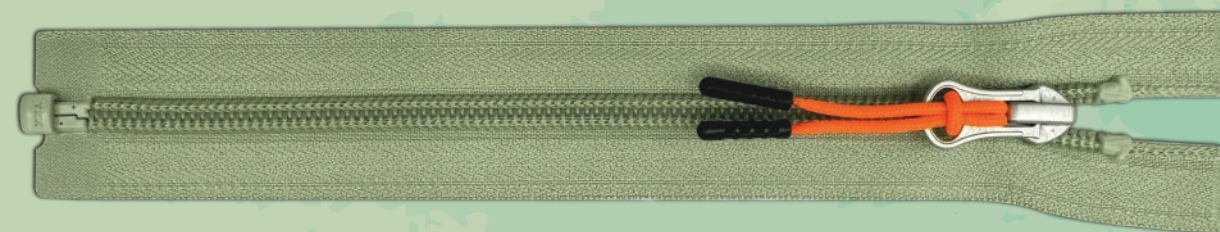

GCV1605
VISLON® with Click Insertion
Code: VSOR-56 DA8LH EJ PB14 GREEN-F KENSIN N-ANTI OP-PMCL SP+FP1473A TIE-TPU1

By creating a distinct click feeling, you can confirm that the separate pin is fully inserted. Additionally, the suppression of the separable pin's movement helps reduce misalignment of zipper. All of this is achieved with almost no change in the product's appearance.

The TPU design puller can be installed onto the diecast slider, creating a seamless integrated design appearance. Both the color of the TPU puller and the diecast puller can be customized according to customer requirements.

GCV1606
NATULON Plus® Coil Zipper with Recycled Zinc Slider
Code: CIBEOR-56 EA8TSG270C C6 PB16 GREEN-F KENSIN N-ANTI TO-IPOM

sustainability action

As part of YKK Sustainability Vision 2050, YKK is working to achieve manufacturing that increases the sustainable use of resources. YKK has announced implementation of ERCA's REVECOL® into the dyeing process in 2023. REVECOL® is not only more sustainable, it is also more efficient, reducing the use of the dyeing auxiliary by 20% to 30%, helping to lower YKK's overall chemical usage.

REVECOL® is a chemical agent that transforms waste materials such as vegetable exhausted cooking oil into high-performance textile chemical.

*Revecol® is a trademark of E.R.C.A. ESPERIENZE RICERCHE CHIMICHE APPLICATE S.P.A.
